

IV. REMARKS

Claim 1 has been amended to incorporate claim 6, which recites that the illumination radiates from a one point.

The Examiner has referred to Fig. 4 and col. 7, lines 15-19 of Graham as disclosing this feature. However, as plainly shown in Fig. 4 and described in the cited portion of the description, two light sources 402 and 404 are used.

Thus the rejection of claims 1-10, 13 and 17 under 35 US 102 on Graham should be withdrawn. Further, since this feature is not suggested by Graham, these claims are unobvious.

Similarly, the remaining claims are allowable.

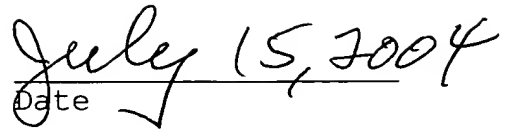

It is respectfully submitted that all of the claims present in the application are clearly novel and patentable, and are in proper form for allowance. Accordingly, favorable consideration and allowance is respectfully requested. Should any unresolved issues remain, the Examiner is invited to call Applicants' attorney at the telephone number indicated below.

The Commissioner is hereby authorized to charge payment for any fees associated with this communication or credit any over payment to Deposit Account No. 16-1350.

Respectfully submitted,

Henry I. Steckler
